ASH GROVE CEMENT WEST, INC.

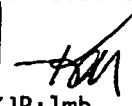

Inter-Office Memorandum

Date July 29, 1985To Erik Voldbaek ✓From Ken Rone

Copies to _____

 ✓ - Activity Report
 Subject Week Ending 7/28/85

- ① Ship left Kaiser's main terminal after sixteen days unloading and was immediately replaced by the "Star Venture" carrying 18,000 tons. In the meantime, the M.V. Golden Coast continued her unloading. Golden Coast arrived at Glacier Sand & Gravel on 7/9/85 carrying 14,000 tons.
- ② Met with Mr. Kamasaka of Mutual Materials, who had originally objected to our pallet return policy. His position has now mellowed and a reasonable compromise has been agreed to. We will accept non-AGCW pallets from Mutual, but pay no refund.
3. Last 1,500 tons of Durkee clinker was unusually fine, however freetime and loss were normal.
- ④ Began regrinding of off-specification and unmerchantable cement. Introducing it to #1 finish mill at 40% blend with clinker.
5. Mr. Miller held meeting with geologist, Ralph Clark, to determine status of raw materials search. Visited White Rive Quarry as it is being readied to mine 4,000 ton test sample for Genstar.
6. Heaviest shipment week of year at 8,050 tons.
7. Morris & Sons again rejected coal offer, saying it was far too expensive. We do not feel that reducing the offering price by \$2.50/ton to our cost will change his position. Fly ash disposal is nearly complete.
8. Will have fly ash trucker continue to haul plant debris to disposal site. Cost will be approximately \$4,000.
9. Held Safety Committee walk through of clinker handling department. No accidents to report.
10. Visitors: Ed Miller.
